Your business has a heartbeat.

See the cash crisis before it arrives.

PULSE AI

The Financial Autopilot for SMEs
Decision support. Human control.

18 DAYS

to the demo forecast shortfall

Why SMEs Struggle

Positive history.
A negative cash date.

REACTIVE

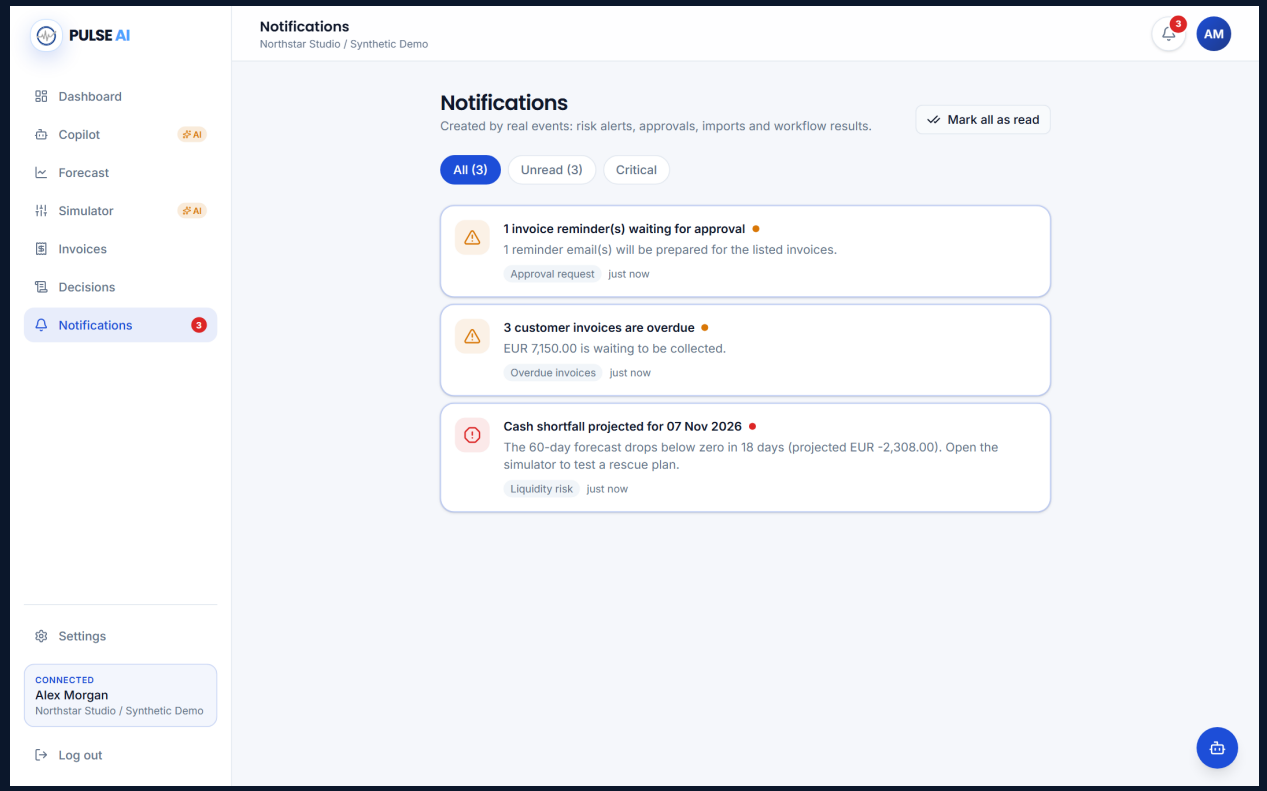

Spreadsheets explain yesterday.

FRAGMENTED

One late invoice changes the picture.

UNSUPPORTED

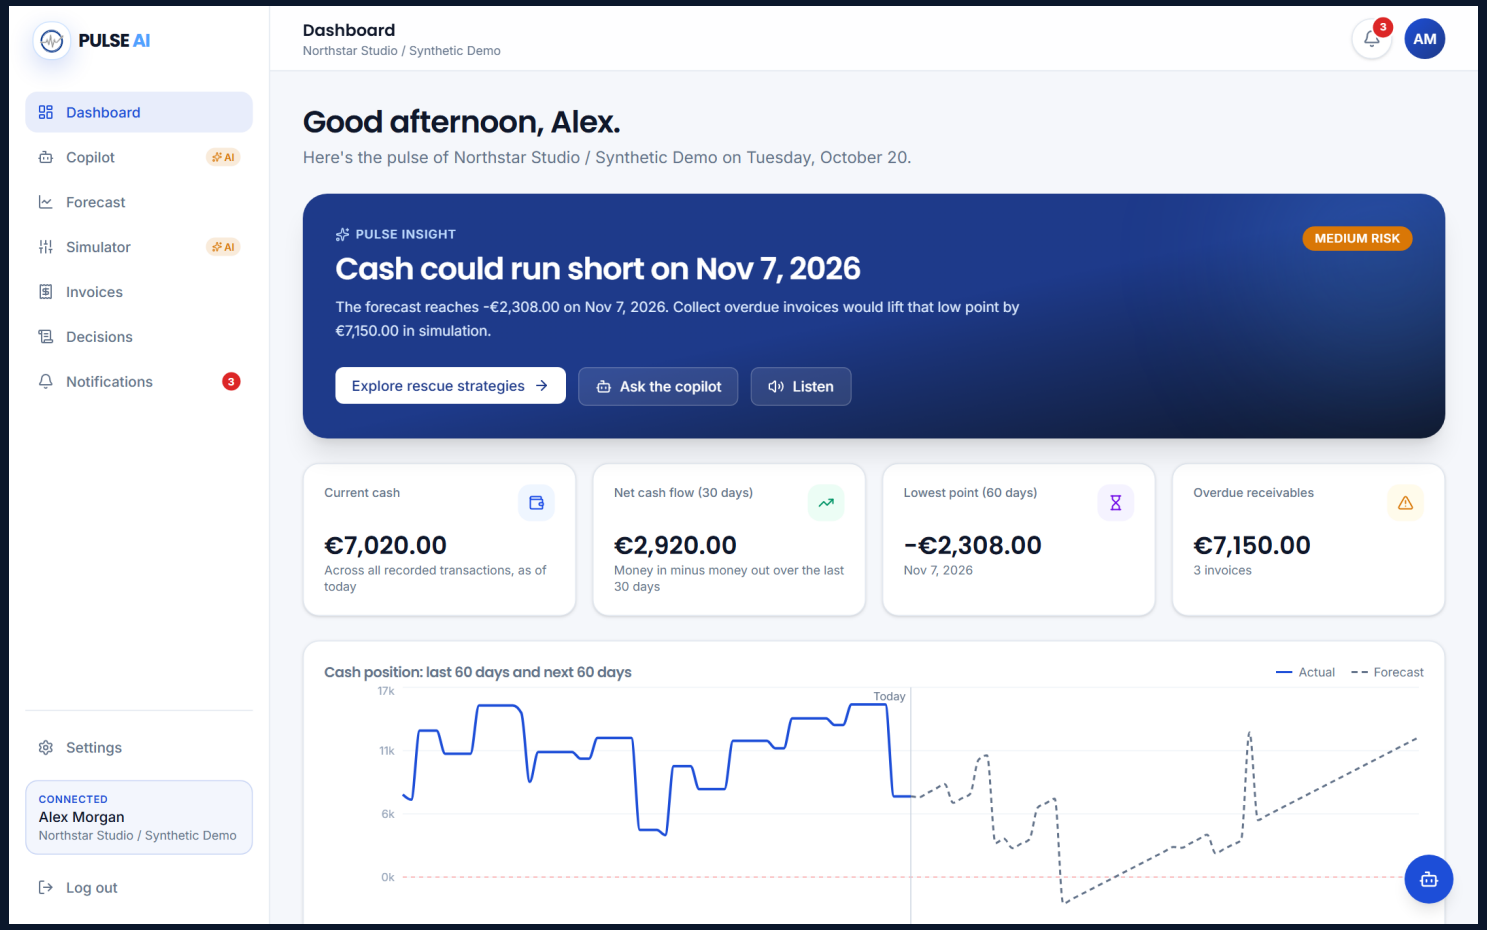

Owners need evidence, not guesses.

Introducing PULSE AI

Understand.
Anticipate.
Simulate.
Decide.

Real calculations first.
Language generation is optional.

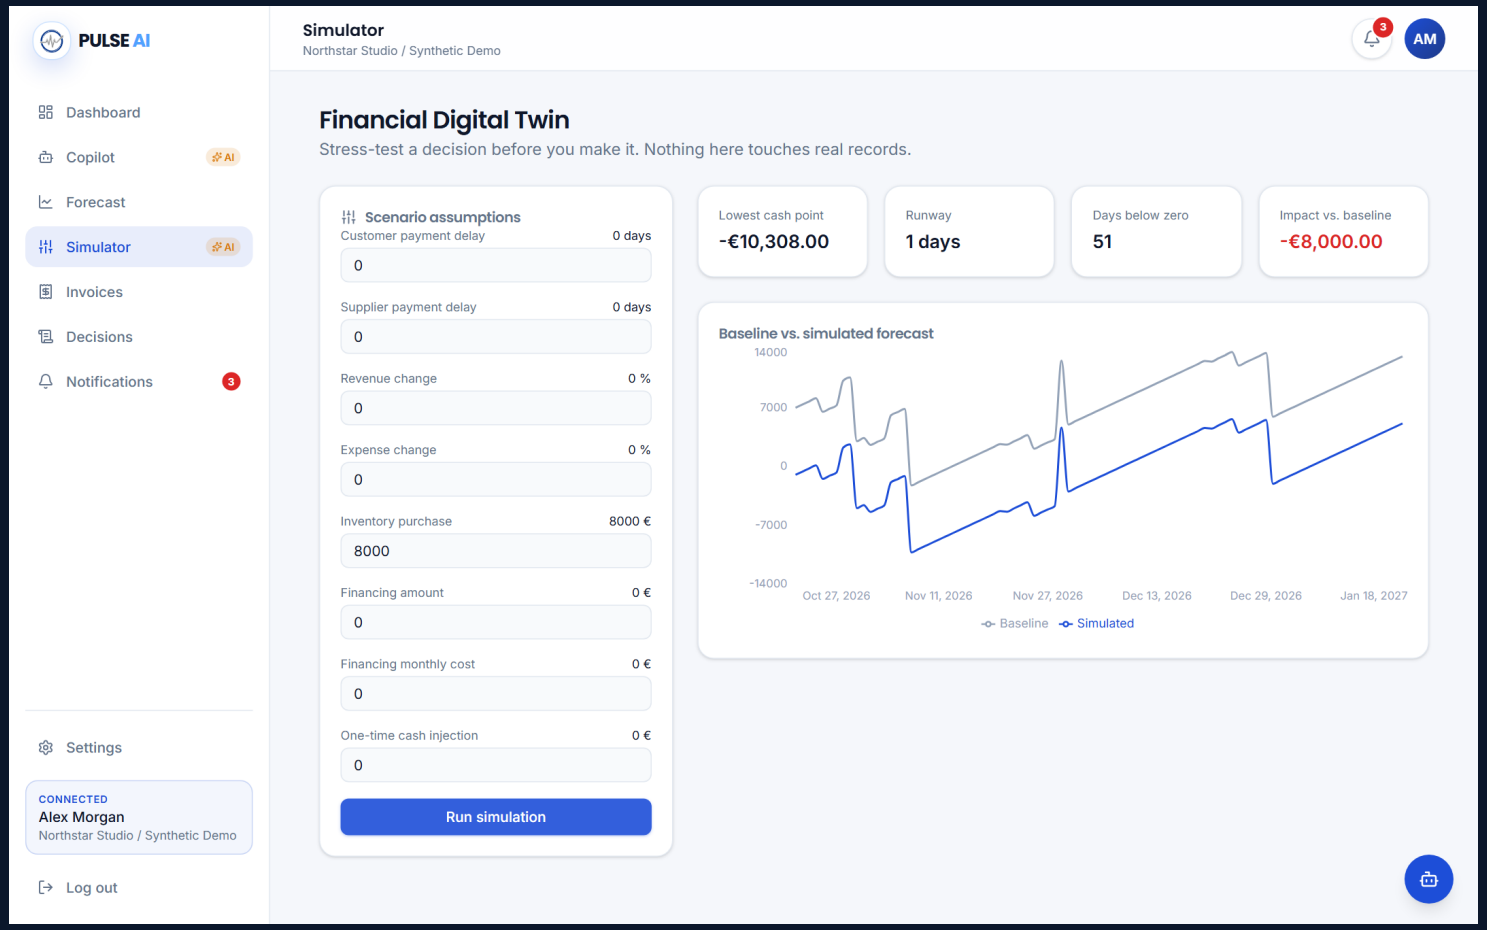

The Financial Digital Twin

One business. More possible futures.

Payment timing
Inventory purchases
Revenue and expense shocks
Financing assumptions

Original financial records stay intact.

Predicting Financial Risk

Known commitments + uncertain daily flow

EUR -2,308.00

lowest projected cash

7 DAYS

below zero in baseline

Actual 90-day engine output · synthetic business · estimates, not guarantees

From Risk to Rescue

What if suppliers grant 15 more days?

BASELINE

EUR -2,308.00

SIMULATED

EUR 2,064.00

NEGATIVE DAYS

7 → 0

EUR 4,372 improvement in the lowest cash point.

A conditional scenario, not a guarantee. Collection and credit alternatives are also ranked by engine results.

Agentic AI Architecture

Specialist roles. Registered tools. Scoped data.

Financial Analyst

Liquidity and invoices

Forecast Analyst

Dates and risk drivers

Strategic Planner

Simulations and rescues

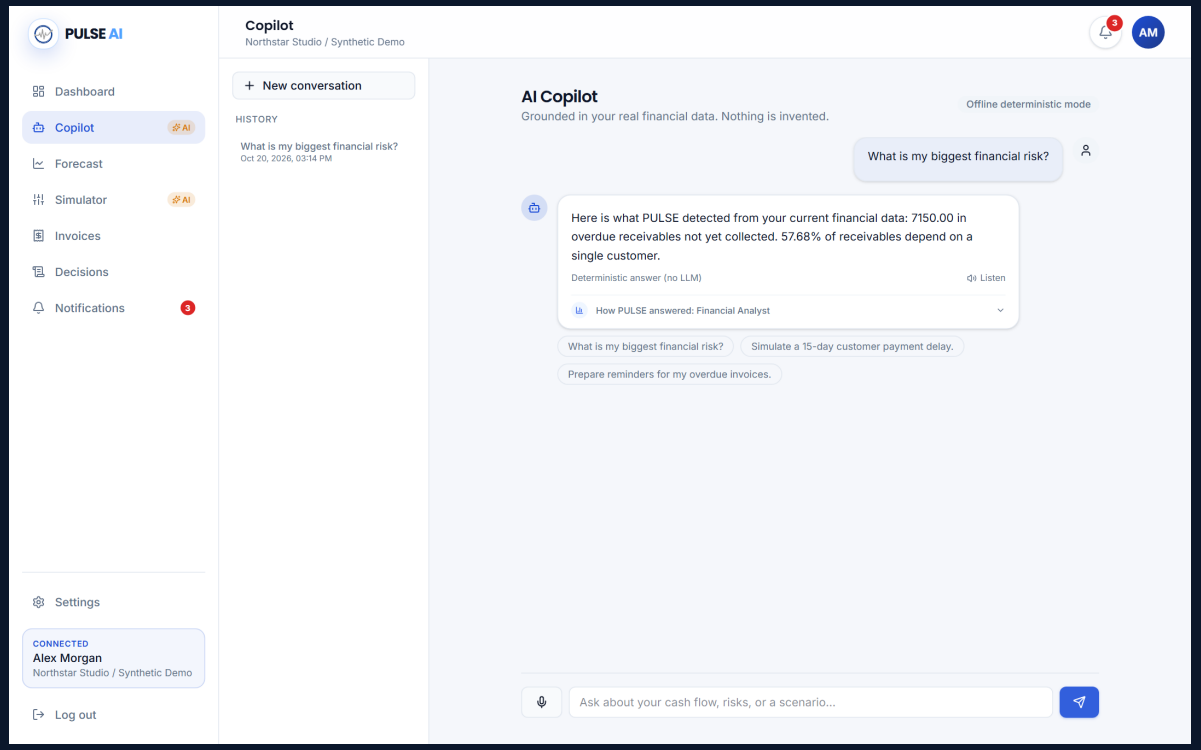

Risk Guardian

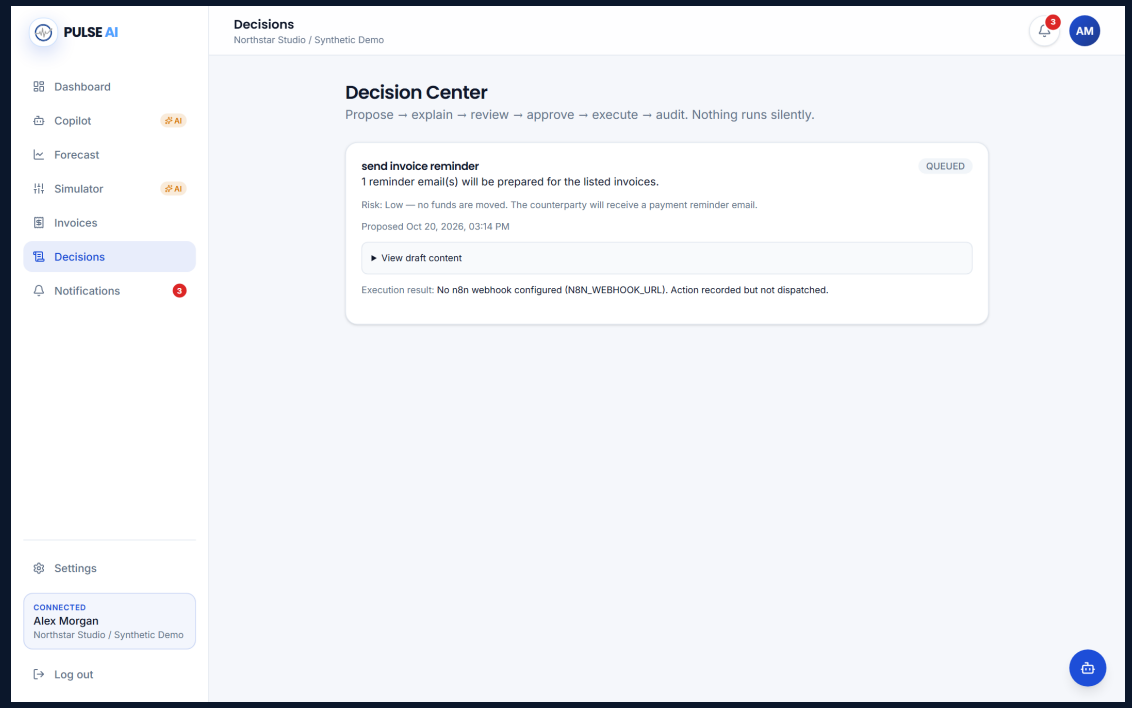

Tool scope and permissions

Orchestrator → deterministic tools → explanation / proposal

No RAG claim. No direct payment tool. LLM tool calling is optional.

Live Demo and Execution Evidence

86 tests passed · Real browser capture · No customer dispatch in this demo

Security and Human Control

Propose → Review → Approve → Execute → Audit

Identity

JWT, bcrypt, email OTP

Scope

Organization and role checks

Control

Approval before execution

Honest boundaries

Next: stronger concurrent idempotency, rate limits, session hardening and validated deployment policies.

Better foresight.
More deliberate decisions.

IMPLEMENTED NOW

Deterministic engine + Digital Twin + optional copilot + human-approved workflows

NEXT CHAPTER

Shared Supabase deployment · Bank feeds · Calibrated uncertainty · Production hardening
